

How to Rig a Set of Playing Cards

Tutorial

[About Me](#)

Welcome! This web site will show you how to successfully rig a deck for less than \$5 or free if you possess the materials already! There are countless of marked cards selling on the internet using this **same** technique but selling for \$20+. If you have the supplies listed, the same trick can be created absolutely free. This is a DIY faq of how to mark your own set of cards.

Note: This web site does not encourage gambling in any way, shape, or form. It is solely for the purpose of magic and entertainment. User discretion is advised.

First of all, here are the supplies you will need:

- 1 deck of **Bicycle** playing cards. I recommend getting the **red** deck as it is harder for others to notice. (You can use non-Bicycle playing cards but this tutorial focuses on the Bicycle brand ONLY) - **\$3.49** [Bicycle Deck of Cards](#)

- a **RED** permanent marker; Sharpie brand is preferred. - \$1.99

Step 1:

Locate the dotted circles on the back of a card. There are **FOUR** of them in total.

Step 2:

Use your red permanent marker to carefully shade in these circles according to this code. Avoid blotting and make sure to color in **ALL** four circles and make sure you turn the card upside down before marking the other circles. Do this process for all 52 cards in the deck.

	Ace		6		Hearts
	King		5		Spades
	Queen		4		Clubs
	Jack		3		Diamonds
	10		2		
	9				
	8				
	7				

Here is an example:

The left circle depicts what the card is, ace through king.

This card is a King represented by a K in the left corner right

It is also a Spade designated by the full circle on the

Step 3:

Practice. Practice. Practice. Memorize the coding system and practice using this deck with your friends or by yourself. Beat up the deck a bit if it is new so people won't notice it as easily.

Step 4:

Go out and perform. DO NOT MAKE IT OBVIOUS BY LOOKING AT THE BACK OF THE PERSON'S CARDS. A tip I found to be successful is to maintain a conversation with the person.

Pocket Jacks, baby!
